

Physiotherapy

DEGREE IN PHYSIOTHERAPY

Place: Madrid
Duration: 4 years
Academic validity: 240 ECTS

Presentation

The CEU San Pablo University of Madrid started to offer university studies in Physiotherapy in 1998. As a result of our experience and adapting the studies to the European Higher Education Area, we have offered the Degree in Physiotherapy since 2010, a degree that lasts four years and is worth 240 ECTS credits. Work experience carried out in different hospitals and specialised clinics is undertaken throughout the four years of studies, with the aim to develop clinical skills and the integration of the student in the working world. In order to carry out their studies, each student is designated with a tutor who will advise them and guide them personally throughout the course of their academic progress.

Objective of this Degree

The objective of the Degree in Physiotherapy is to provide our students with all of the necessary training to be able to perform numerous tasks as a physiotherapist, be that in the private sector (doctor's surgeries and clinics) or the public one (hospital network, social and health services, etc.), both nationally and internationally.

Over the last few years, the demand for professionals in this sector has increased in order to cover the needs of a population that suffers occupational and traffic accidents, but which additionally, and thanks to the advances achieved, has a greater life expectancy rate therefore presenting a greater number and longer duration of chronic diseases. At our university, we are responsible for giving our students an excellent theoretical and practical training so that they are capable of taking care of their future patients in an optimum way and can develop a successful professional career.

Program

First Year

ECTS

Anatomy of the Locomotor System	6
Biology	6
Anthropology	6
Physiology	6
Foundation of Physiotherapy	6
General Anatomy I	3
General Anatomy II	3
Biophysics	3
Assessment in Physiotherapy	6
Physical Agents I	4
Physical Agents II	4
Principles of Kinesitherapy	4
Study of the Human Movement	3

Second Year

ECTS

Practical Basis of Kinesitherapy	3
General Pathology	6
Physical Agents III	6
Statistics Applied to Health Sciences	6
Psychosocial Sciences Applied to Physiotherapy	6
Medical and Surgical Conditions I	3
Public Health	3
Specific Methods in Traumatology and Orthopaedics	4,5
Manual Therapy I	4,5
Physiotherapy in Trauma and Orthopaedic Processes	6
Medical and Surgical Conditions II	3
Modern Languages	6
Clinical Practice	3

Third Year

ECTS

Medical & Surgical Conditions III	6
Clinical Integration	4,5
Physiotherapy in Diseases of the Central and Peripheral Nervous System	3
Physiotherapy in Diseases of the Cardio-Respiratory System	3
Physiotherapy in Diseases of the Cardiovascular System	3
Specific Methods in Adult Neurology	4,5
Specific Methods in Infant Neurology	4,5
Specific Methods in Circulatory Diseases	3,5
Manual Therapy II	4,5
Medical and Surgical Conditions IV	5,5
Specific Methods in Diseases of the Cardio-Respiratory System	3,5
Legislation and Deontology in Physiotherapy	3
Health Complementary Techniques	3,5
Clinical practice II	5
Research in Health Sciences	3

Fourth Year

ECTS

Physiotherapy in Obstetrics and Genital and Urinary Systems	3
Physiotherapy in Physical Activity and Sport	3
Physiotherapy in Geriatrics	3
Physiotherapy in Temporo-Mandibular dysfunction	3
Skeletal muscle physiotherapy techniques	3
Social Doctrine of the Catholic Church	6
Physiotherapy Management	3
Prevention in Physiotherapy	3
Final Year Project	6
Clinical Practice III	18
Clinical Practice IV	18
